MANAGEMENT COMMITMENT

TO WHOM IT MAY CONCERN

The management of our company believes that Aquatic Products exports need to control the disease prevention and Hazard Analysis of critical control point, being developed and important at our facility. It is important that the employees and the suppliers are need to knowledge about the disease prevention and HACCP. Our company management, staff and suppliers are committed to support HACCP and disease prevention. The end product is fit for human consumption; and the food safety program complies with the requirements of Bangladesh fish and fish product (Inspection and Quality Control) Rules- 2008, EU Regulations and USFDA Seafood Regulation.

If any revision of the standards or any legal changes in the rules and regulations, that is imposed of thought to be more effective by the local authority, we are committed to implement those regulatory norms immediately in our company.

SYED NAZRUL ISLAM
Proprietor
Ocean Trade International

COMPANY BACKGROUND

1.1 INTRODUCTION

Bangladesh is an Argo-based country and Fisheries is one of the sub-sectors of agriculture which plays an important role in the economy of this country. According to FAO report The State of World Fisheries and Aquaculture 2018, Bangladesh ranked 3rd in inland open water capture production and 5th in world aquaculture production.

Mud eel fish (*Monopterus Cuchia*) is very tasty and nutritionally rich with medicinal value and has high price in foreign market. It is considered one of the potential export items particularly among fisheries products. According to *Export Promotion Bureau (EPB)* of Bangladesh in 2017-18 fiscal years, Bangladesh earned 15 million USD by exporting 70.0175 tons cuchia. Bangladesh exports cuchia in 17 countries. It is commercially important due to its availability, high demand for export and the value of earnings has been steadily increasing yearly.

The crab plays an important role in the national economy by earning from export. The contribution of crabs is 0.34% into the total fish production of Bangladesh in 2018-2019. Crab fattening is widely practiced in Bangladesh. Crab has been well-accepted as a good source of protein and antioxidant properties, scrumptious and demandable crustacean in the world. Live crab marketing is a profitable business. China is one of the largest importer of the world. In some years, crab business has been increasing due to buyers demand. About 2.5-3.00 Lac people are directly involved in crab value chain. Bangladesh started exporting crab in 1977 by exporting live and frozen crabs to 17 countries. China is the single largest crab importer. In the southwest coastal belt of Bangladesh, millions of poor fishers, traders and transporters are directly or indirectly dependent on live crab catching and collection.

OCEAN TRADE INTERNATIONAL is exporting aquatic product which is situated at (office) House -36, Sonargaon Janapath Road, Sector -12, Uttara, Dhaka-1230 and packing Center at House – 04, Road -2, Block – C, Nolbhog, Nishatnagar, Turag, Dhaka-1230. This company began operating in this field in 2012, had a break from 2022 to 2024, and then resumed operations at the start of 2025.

1.6 PRODUCT PROCESSING CAPACITY

The plant has packing approximately capacity **70 Ton** of live crabs and **170 Ton** of live eels Fish per month.

1.7 CIVIL & PRE-FABRICATION

OCEAN TRADE INTERNATIONAL has construction area of factory **3,000 SQ FT** as per design layout. This plant is always environment pollution free.

GENERAL MANAGEMENT SYSTEM

2.1 STAFF MANAGEMENT

In order for the company to develop steadily and healthily, employees can obtain greater economic benefits and create a safe and harmonious working environment the following rules and regulations are formulated.

A. Attendance System

- ✚ Company employees must consciously abide by labor discipline, go to and from get off work on time, not be late or leave early.
- ✚ Employees cannot leave his post without authorization during working hours, and must obtain the consent of the person in charge of the department.
- ✚ If cannot go to work under special circumstances, employees must ask for leave in advance.

B. Safekeeping System

- ✚ Establish a detailed account of aquatic products entering and leaving the warehouse.
- ✚ The entry and exit of aquatic products and tools must be approved by the custodian and tools must be put in the warehouse after use. The company's materials are not allowed to be borrowed or misappropriated. If there are special circumstances, the approval of the leader can be used.

C. Workshop System

- ✚ When entering the warehouse, employees must measure their body temperature, masks and protective clothing and disinfect them.
- ✚ When entering the workshop, you must wear boots and no slippers to work in order to prevent accidents.
- ✚ The personnel on duty must stick to their posts, regularly check the water level in the pool, and must not leave their posts and stay at home.
- ✚ Safety production must be achieved; electrical appliances must be used correctly.
- ✚ Personnel engaged in aquatic product packaging must have regular physical examinations and obtain health certificates before they can work.

- ✚ Eating and smoking are prohibited in the workshop; spitting is strictly prohibited; before work and after using the toilet, or when the hands are contaminated, hands should be washed and disinfected in time.
- ✚ Workshop staff should maintain personal hygiene and observe hygiene rules. Wear clean, light-colored work protective clothing, boots and shoes, and work caps;

2.2 PACKING PLANT HYGIENE AND DISINFECTION MANAGEMENT

Disinfection is an effective measure to cut off the spread of Aquatic Product diseases and eliminate the source of the disease.

- ✚ Strictly implement the relevant provisions of the Aquatic Products Epidemic Prevention Law and other laws and regulations, earnestly implement the disinfection system and abide by the disinfection operation specifications.
- ✚ The equipment, tools, transportation vehicles, spare parts, etc. in the packaging factory shall be cleaned daily, thoroughly disinfected with disinfectant.
- ✚ Regular disinfection should be done in the packaging factory and surrounding environment.
- ✚ Garbage from the packaging plant should be transported to the designated waste accumulation treatment site, and it is strictly forbidden to litter or dump it.
- ✚ Disinfection equipment and disinfection drugs must be equipped, and the use of disinfection drugs must be strictly followed and recorded.

2.3 AQUATIC PRODUCTS SANITATION AND DISEASE PREVENTION MANAGEMENT

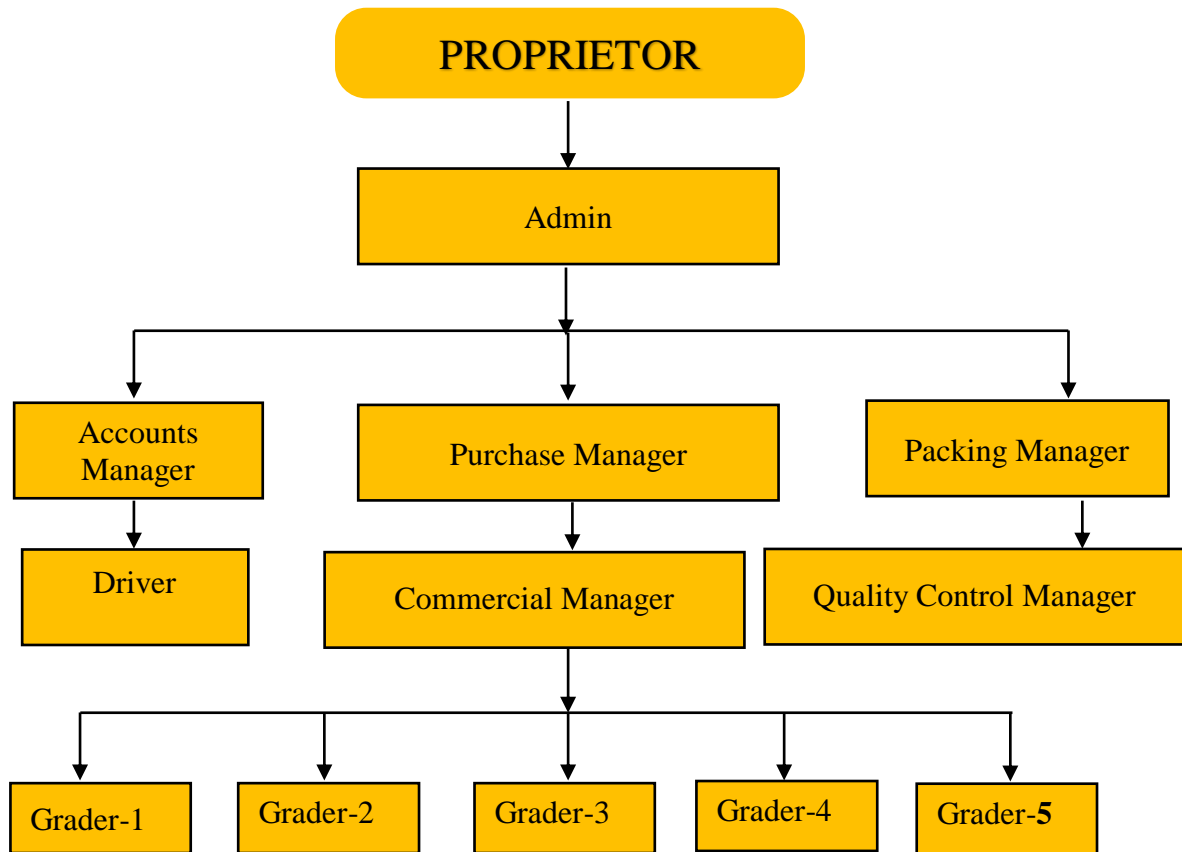

- ✚ The garbage in the living area has protective measures, cleaned up in time, and kept clean.
- ✚ Clean the packing utensils once a day and keep them clean.
- ✚ Outsiders are not allowed to enter the packing area at any time.
- ✚ When a local disease is discovered, pack utensils for disinfection, and effectively isolate the source of the disease.
- ✚ The dead aquatic products shall be destroyed on the same day, and the outer packaging of used medicines shall be uniformly placed and destroyed

regularly.

- ✚ The purchased aquatic products are quarantined to prevent the introduction of pathogens.
- ✚ Regular disinfection and disease prevention drugs are put into packaging factories.

2.4 ORGANOGRAM

AQUATIC PRODUCT SAFETY TRACEABILITY SYSTEM

3.1 DUTIES OF RECORDING

- ✚ The production department is responsible for the centralized management of product identification and traceability.
- ✚ The Comprehensive Management Department is responsible for the identification of inspection status.
- ✚ Warehouse management personnel are responsible for the identification of the purchase and sorting of aquatic products.
- ✚ The personnel of each production link are responsible for the identification and traceability of products within the jurisdiction of the production process.
- ✚ The factory packaging personnel are responsible for the identification and traceability of the finished products.
- ✚ The sales staff is responsible for recording all customer information.

3.2 AQUATIC PRODUCT PACKAGING AND LABELING SYSTEM

In order to strengthen the management of the traceability of aquatic products, ensure the quality of aquatic products, and safeguard the legitimate rights and interests of producers, operators and consumers, this system is formulated in accordance with the management of aquatic products in Bangladesh.

- ✚ When formulating aquatic product labels, aquatic production units shall strictly implement the specific regulations of relevant national standards.
- ✚ The aquatic product unit selling aquatic products shall be accompanied by aquatic product labels, indicating the unit's name, address, product type, specifications, date of discharge, product quality, shelf life etc.
- ✚ Units or individuals that have obtained the certification of pollution-free aquatic products may use the mark of pollution-free aquatic products on the products, packaging, labels, advertisements, and instructions specified in the certificate.
- ✚ All units and individuals who have obtained the certification of pollution-free aquatic products can apply to the certification body for the mark of pollution-free aquatic products, which shall be used within the scope of the certified variety and quantity.
- ✚ Forgery, alteration, misappropriation, fraudulent use, trading and transfer of aquatic

product labels are strictly prohibited, and consciously accept the supervision of the quality management department.

3.3 AQUATIC PRODUCT TESTING

Regular quality inspections for heavy metal content and other items by appoint third-party authority.

3.4 SPECIFIC OPERATIONS OF AQUATIC PRODUCT TRACEABILITY

- ✚ A. Starting from the fishing operation in the fishing area, each production area will tie different colored laces on the fishing cage. The red, yellow and blue colors indicate the corresponding production area. Default red represent Khulna Area yellow represents Satkhira Area Blue represents Chittagong Area
- ✚ B. After the product is harvested and landed, it will be sent to the Dhaka packing plant together with the fishing cage, and stored in the storage room (3 locations) corresponding to the marked production area for temporary storage, and will be sorted and packaged later
- ✚ C. When the products are sorted and packaged, each time it is carried out only for the products in a single storage room. When the goods are packed, the box number and the abbreviation of the production area will be clearly marked on the outer packing box, and the corresponding accounting records will be made
- ✚ D. When transporting and warehousing, the product batch, box number and other ledger contents should be transferred accordingly, and the quality inspection should be completed to complete the inspection and send to the airport warehouse.

3.5 SOLUTIONS OF UNQUALIFIED AQUATIC PRODUCTS TRACEABILITY

Traceability should be conducted when there is a serious disqualified during the inspection process. The traceability process of production batch records for unqualified products as followings:

Note: If the proportion of unqualified products is found to be abnormal or too high, after completing the traceability, the packaging enterprise should stop purchasing the aquatic products from the supplied production area.

And must promptly report to local officials the percentage of deaths of aquatic products during transportation and packaging.

EPIDEMIC PREVENTION CONTROL SYSTEM

4.1 STIMULATIONS OF STAFF

- ✚ **Wear masks and protective clothing:** Employees must wear masks and protective clothing when going to get off work and entering workshops/warehouses, and choose and regularly replace masks and protective clothing according to the situation. Employees who do not wear masks are prohibited from entering the factory area and work positions.
- ✚ **Hand washing and disinfection:** Before entering the workshop and before touching aquatic products, personnel must scrub and disinfect their hands with hand sanitizer. Operators who come into contact with aquatic products need to be disinfected at least once every hour during their work.
- ✚ **Work clothes wear:** Work clothes should completely cover all parts of the body except for hands and face; work clothes, aprons, sleeves, etc. need to be cleaned, disinfected and dried every day. Disposable gloves should be disinfected before use. When entering the production area, you must change into working shoes and step on the disinfection pad. The working shoes shall be cleaned and disinfected regularly as required.
- ✚ **Temperature measurement of employees:** Before entering the factory, employees should take their temperature measurements. If employees develop suspicious symptoms such as fever, cough, sore throat, chest tightness, dyspnea, fatigue, nausea and vomiting, diarrhea, muscle aches, etc., they should stop working immediately, report and register immediately, and go to the medical institution for treatment in time according to the condition.

4.2 AQUATIC PRODUCT

Stimulations of Aquatic Products Packaging and Storage

- ✚ **Purchasing** : Packaging enterprises shall conduct inspection and quarantine on the aquatic products to be purchased
- ✚ **Storage:** The materials and structures of the containers and transportation tools for aquatic products should be strong, non-toxic and easy to clean. The aquatic product storage area must be well ventilated, dry, and kept clean. Aquatic products of different

types and specifications should be placed in different areas.

- ✚ **Inspection:** All aquatic products must be set up with specific dedicated passages and quarantine areas. During acceptance, first ensure that the acceptance area is clean and hygienic, with sufficient natural light. After the acceptance is completed, it will be placed in a dedicated area and handled by a dedicated person when using it. Sorting, Packing and Packaging of Aquatic Product.
- ✚ **Anti-fouling treatment:** Before sorting, the aquatic products are effectively showered and cleaned to remove body surface pollution, and the aquatic products are cleaned.
- ✚ **Cleaning and disinfection:** The packaging tools after each shift should be cleaned and disinfected immediately and stored in the designated area to keep them clean. The cleaning and storage rooms for tools and instruments should be well ventilated, and there should be no indoor mold and peculiar smell; Dead aquatic products will be destroyed on the same day, and the used outer packaging will be placed uniformly and destroyed regularly.
- ✚ In the process of sorting and packing, record the death rate of aquatic products on dash board of the plant. If the proportion of deaths of aquatic products is abnormal, the proportion of deaths of aquatic products during transportation and packaging must be reported to local officials in time.

4.3 STIMULATIONS OF PACKING PLANT

- ✚ **Factory sanitation management and control:** Aquatic product packaging enterprises should all enter through a unified gate according to the epidemic prevention requirements, and enter different gates from the goods. The gates connected to the dormitory should be closed and disabled. All processing workshops, public areas, meeting rooms, dormitories, vehicles, etc. within the enterprise shall be disinfected and foreign vehicles are strictly prohibited from entering the factory or production and business premises.
- ✚ **Disinfection of the plant and the site:** Daily cleaning the ground of the plant and the site to clean up debris; check the ground, drains, etc., and block or install isolation baffles in time to prevent pests and rats. If the stagnant water is found, it should be removed immediately to ensure that the sewer pipe is unblocked.
- ✚ **Waste and garbage disposal:** Waste and garbage storage should be far away from production and living areas, should not be exposed to the outdoors, and should not cause

pollution to other areas. The surrounding area of the sewage treatment station shall be kept clean and sanitary to prevent the odor and silt from polluting other areas.

- ✚ **Surrounding environment management:** Pay special attention to whether there is potential pollution sources around, such as random (or unintentional) discharge of pollutants. If there is an epidemic situation such as dead aquatic products, it should be reported to the superior authority in time and the surrounding area should be disposed and disinfected. Disinfect the plant area and surrounding areas by spraying disinfectant at least weekly.
